Why should anyone pay the Green Section for advice when there is free advice available from other resources? Good advice is only as good as its source, and the source is only as good as its background, experience and actual performance. **The USGA Green Section is the only agency in the country devoted solely to golf course turf, its playing conditions and its management.** It sells nothing. The USGA's 18 regional agronomists make more than 1,800 TAS visits to golf courses each year. This unique experience offered to your course cannot be matched by any individual or agency anywhere.
